Re.: Congressional requests

Dear Cathy:

The major categories which concern INBIFO/CRC are:

1. All animal research
approx. 300 studies with approved reports
(300 x 1000 pages protocols and reports = 300,000 pages)

approx. 120 studies with QA-approved raw data
(120 x 6,000 pages original data = 700,000 pages)

17. Nicotine analogues
approx. 40 studies
(40 x 50 pages protocols and reports = 2,000 pages)

Apart from this, the amound of records, falling into categories 2, 16, 19, 28, and 35 are negligible

The time required to select the relevant reports and protocols will take approx.
15 min/study x 340 studies = 90 h = 12 d
for 1 senior manager and
1 help

To search and select the relevant original data (for all studies without summarizing reports) will take approx.
30 min/study x 120 studies = 60 = 8d
for 1 senior manager and
1 help

General Manager: Dr. Wolf Reininghaus

Source: https://www.industrydocuments.ucsf.edu/docs/lyvk0000

To scan and extract all relevant notes and evaluations for all animal research (as requested in # 1) will take approx.

30 min/study x 300 studies = 150 h = 20 d
for 1 senior manager and
1 help

To copy the selected material will take

1. for reports:
   10 pages/min x 300,000 pages = 500 h = 60 d
   for 2 persons operating
   1 copier

2. for original data:
   5 pages/min x 700,000 pages = 600 h = 70 d
   for 2 persons operating
   1 copier

There are 2 important questions relating to # 1:

1. Does "All documents relating to animal research" really mean to **all** animal research or rather to all **nicotine related** animal research?

2. What is requested "... including notes, reports, and evaluations..." (line 2) or "...summaries of such data" (line 7)?

Kind regards,

Wolf Reininghaus
